

## **A letter from President of the Czech Society of Phlebology.....**

Dear phlebological community in the world, dear colleagues with common or close interests,

I would like to greet you in this traditional way and invite you to this year's 49th Phlebology Days in Prague. No, I wasn't mistaken! That serial number is indeed correct. During the historical mapping of all events organized since 1964, since the date of organized phlebology in the then Czechoslovakia, one number was omitted in the late 1960s. We are thus correcting this error.....

For this year, we granted the wish of the coryphea of world phlebology, the Hungarian native prof. Zoltán Várady and we added his famous Várady workshop to our event. We only provide time and space, the program will be provided by the professor and his close associates.

To those who do not know the curriculum of our guest, we just remind you that he is the father of modern microsurgery of varicose veins and the creator of the so-called Várady's Instrumentaria. More on our website.

Please follow both websites, i.e. [www.flebodny.cz](http://www.flebodny.cz) and [www.phlebology.cz](http://www.phlebology.cz), where there will be more information about this year's event as soon as possible.

Yours Jaroslav Strejček, Chairman of the ČFLS
